

PLATE WARMER – SINGLE TUBE

ROYSTON[®]

Easily transport warmed plates anywhere in your establishment. Large capacity of 150 plates.
Adjustable temperature control

Description

The double tube plate warmer allows you to easily transport sanitised and warm plates to your buffet lines. This mobile plate warmer is on castors for added mobility and can hold approximately 150 plates. The adjustable plate tube allows you to store and transport plates of different sizes. The full stainless steel construction and the adjustable temperature range of 30°C to 85°C ensure that your premises is always compliant with the most stringent food safety laws.
