

Royston 10 LITER SOUP KETTLE

ROYSTON[®]

10L soup kettle with ample volume to heat and display your most popular soups, sauces and stews. Thermostat controls and heat resistant outer casing making this unit a breeze to operate and clean

Description

Heat and display soups, gravies, stews and sauces in this 10 Litre soup kettle. With a convenient ladle hole, your contents remain protected from nasty elements that might get in were the lid left open. The simple thermostat controls that range from 30°C to 110°C allow you to set different temperatures for different contents: ensuring nothing ever burns or doesn't heat enough. The heat resistant outer casing makes it easier to handle the kettle even when it is turned on or in use.
